

8N386CL

KEY STRENGTHS

- CLEARFIELD® herbicide technology for expanded weed control options.
- Good overall plant health with strong stalks and excellent roots.
- Works well for both oil and bird food markets.

MANAGEMENT GUIDELINES

- Growers should protect their seed investment and stand establishment by purchasing seed treated with CruiserMaxx™ Sunflower, a fungicide and insecticide treatment.
- Stand establishment is important. Maintain planters in optimum condition. Monitor planting depth. It is preferred to plant 1.5 inches deep and into at least 0.5 inch of moisture. Seed may be planted 2.5 inches deep, but expect delayed emergence and reduced stands.
- Plant during an acceptable "planting window" for your area. Be sure the hybrid maturity rating is appropriate for the planting date.
- Under no-till practices, increase plant populations by 5 percent to 10 percent versus conventional till management.
- Growers should monitor fields for insect pests and use appropriate insecticides if needed. The economic threshold is dependent upon infestation, pesticide cost and crop value.
- Sunflower should be harvested in a timely manner. Harvesting below 10 percent moisture reduces marketable yields and increases the chance for combine fires.
- Developed to be used with the CLEARFIELD® Production System. CLEARFIELD hybrids are tolerant to applications of Beyond® herbicide. Follow label directions for growth stages and application rates.

MATURITY TRAITS

Maturity Group 3-4.....	4
Days to Flowering.....	67
Days to Physiological Maturity.....	96

MANAGEMENT TRAITS

Suitability - Solid Seedling.....	7
Suitability - Delay Planting.....	7

AGRONOMIC TRAITS

Plant Height.....	7
Neck Type.....	Medium
Neck Kinking.....	7
Head Attitude.....	Semi-upright
Center Fill.....	9
Kernel Retention.....	9

DISEASE AND INSECT TRAITS

Phomopsis.....	6
Rust.....	8
Sclerotinia Head Rot.....	7
Sclerotinia Stalk Rot.....	6
Verticillium.....	7
Midge.....	5

Market Options

	Oilseed crush/NuSun®
	Oilseed crush/Omega-9 Oils
	Dehulling
	Bird food
	Confection

Ratings: Mycogen Seeds utilizes a 9=Excellent, 1=Poor rating scale. Plant Height is rated using a 9=Short, 1=Tall scale. Days to Flowering and Days to Maturity are calculated from planting date. n/a is Insufficient Data. Actual ratings based on best current information available and may be affected by changing environmental conditions. Mycogen Seeds warrants that the seed sold by it conforms to the descriptions on accompanying labels within tolerances established or permitted by law.
