ODYSSEY DLX on CLEARFIELD lentils technology sheet

Why choosing ODYSSEY® DLX makes sense

Based on the same proven **ONE-PASS** convenience of ODYSSEY, ODYSSEY DLX provides CLEARFIELD® lentil growers a wider application window with premium grass control.

How ODYSSEY DLX works

ODYSSEY DLX combines two modes of action, including NEW Group 1 chemistry, to deliver premium grassy weed control with a wider window of application while optimizing your resistance management. And because it's built on the same proven chemistry as ODYSSEY, it delivers control of tough broadleaf weeds, including extended control of flushing weeds.

What crops can follow ODYSSEY DLX in the rotation

Canary seed	Durum wheat	Spring barley
CLEARFIELD canola	Field peas	Spring wheat
CLEARFIELD lentils	Lentils	Tame oats

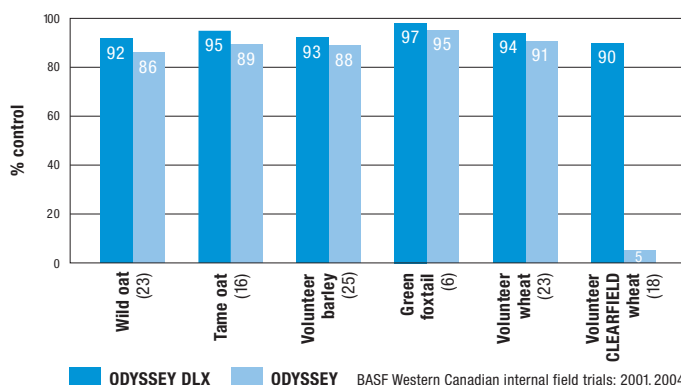

Flax, non-CLEARFIELD canola and sunflower can be safely planted two years after ODYSSEY DLX application.

What ODYSSEY DLX controls

Broadleaf weeds controlled	Chickweed	Stinkweed
	Cleavers (up to 4 whorls)	Stork's-bill
	Flixweed	Volunteer canola (non-CLEARFIELD canola only)
	Green smartweed	Volunteer tame mustard
	Redroot pigweed	Wild mustard
Broadleaf weeds suppressed	Shepherd's-purse	Hemp-nettle
	Hemp-nettle	Russian thistle
Grassy weeds controlled	Lamb's-quarters	Wild buckwheat
	Barnyard grass	Volunteer tame oats
	Green foxtail (wild millet)	Volunteer wheat (including CLEARFIELD wheat)
	Persian darnel	Wild oats
	Volunteer barley	

Multiple-flushing weeds appear in bold.

Grassy weed efficacy

CLEARFIELD®
production system | for lentils

When to apply ODYSSEY DLX

ODYSSEY DLX has a wide window of application, so you can control early-emerging weeds before they affect yield.

Crop	CLEARFIELD lentils: 1- to 6-node stage
Broadleaf weeds	Cotyledon to 4-leaf stage
Grassy weeds Barnyard grass, Persian darnel, volunteer oats	1- to 4-true-leaf stage (6 total leaves, including 2 tillers)
Grassy weeds Green foxtail, wild oats, volunteer barley, volunteer wheat (including CLEARFIELD wheat)	1- to 6-true-leaf stage (up to 2 tillers)

How much to apply

Each case of ODYSSEY DLX contains enough herbicide to treat 40 acres. **The surfactant MERGE® is required for herbicide activity and is included in the ODYSSEY DLX packaging. No additional MERGE is required.**

Always ensure that the rate of MERGE is 0.5 L/100 L of spray solution (0.5% spray solution) for optimal performance. **For example, to treat 40 acres:**

Water required	MERGE required	ODYSSEY required	EQUINOX™ required
10 imp. gallons/acre	1 x 8.1 L jug	8 x 5 acre pouches	1 x 2.67 L

For more information about ODYSSEY DLX, call **AgSolutions®** by BASF at 1-877-371-BASF (2273) or visit our website at www.agsolutions.ca

Always read and follow label directions.

Application tips

- To maximize herbicide performance, apply ODYSSEY DLX in warm weather to weeds that are actively growing.
- Avoid applying ODYSSEY DLX immediately after or preceding a frost or unseasonably cold weather.
- Ensure that the rate of MERGE is 0.5 L/100 L of spray solution.
- ODYSSEY DLX is rainfast 3 hours after application.
